Separate paging is given to this Part in order that it may be filed as a separate compilation

PART III—SECTION 2

Notifications and Notices Issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 9th October 1954

SPECIAL NOTICE

There will be no notifications on 16th October 1954

CORRIGENDUM

In the Gazette of India, Part III, Section 2, dated the 7th August 1954, in page 156, column 1, under the heading "Applications Accepted"—

for No. "8444" read No. "48444".

Applications for Patents

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

23rd September 1954

- 52790. M. J. Udy. Manganese recovery.
- 52791. H. W. Waldenmaier. Improvements in or relating to butterfly valves. (Addition to No. 50871).
- 52792. Ciba Limited. Pharmaceutical preparations containing a new piperidine compound. (Divisional date, July 20, 1953).
- 52793. Ciba Limited. Pharmaceutical preparations containing new substituted piperidines. (Divisional date, July 20, 1953).
- 52794. Lazalloys Limited. Improvements in rock drills.

24th September 1954

- 52795. The National Smelting Company Limited. Improvements in or relating to the condensation of metal vapours. (6th October 1953).
- 52796. Compagnie Francaise Des Matieres Colorantes. Method of preparation of sulphamic aromatic acids. (17th September 1954).
- 52797. Calumet & Hecla, Inc. Method and apparatus for manufacturing integral finned tubing.

25th September 1954

- 52798. Council of Scientific and Industrial Research. A process for the preparation of synthetic tanning materials.
- 52799. Council of Scientific and Industrial Research. A process for the preparation of synthetic tanning materials.
- 52800. D. Singh. A non injection type attachment to use kerosene in petrol-vehicles.
- 52801. Council of Scientific and Industrial Research. The Production of a special gelatin solution suitable for use as a plasma substitute (plasma volume restorer or expander) by a new method.
- 52802. Boots Pure Drug Company Limited. New compositions comprising sulphur-containing compounds.
- 52803. American Cyanamid Company. Improvements relating to the production of cyanamide and/or melamine. (30th April 1954).

27th September 1954

- 52804. Satya Industries Ltd. Improvements in head lamps of automobiles, motor cycles and bicycles.
- 52805. Standard Oil Development Company. Method and apparatus for oil well operations.
- 52806. Bowaters Development and Research Limited. Gloss meter. (12th October 1953).
- 52807. O. J. Bruun. Improvements in safety bottle capsules. (12th July 1954).
- 52808. Imperial Chemical Industries Limited. Improvements in or relating to the surface treatment of titanium or titanium base alloys. (9th October 1953).
- 52809. Aladdin Industries Limited. Improvements in or relating to hydrocarbon vapour burners. (6th October 1953).
- 52810. J. N. Wiser. A process for long-time bio-stabilization of dairy products and means for applying same.
- 52811. The Indian Hume Pipe Company Limited. Reinforced concrete pipe and method of manufacturing same.
- 52812. Automatic Telephone and Electric Company Limited. Improvements in registering and translating circuits for use in telecommunication system. (9th July 1952). [Divisional date, July 1, 1953.]
- 52813. Automatic Telephone and Electric Company Limited. Improvements in telephone systems. (9th July 1952). [Divisional date, July 1, 1953.]

28th September 1954

- 52814. College of Engineering and Technology, Bengal Jyotsna Kumar Choudhury and Sailesh Chandra Dasgupta. Harmonic elimination equipment.
- 52815. Waagner-Biro Aktiengesellschaft. Damming wall for weir closures, sluice-gates and the like.
- 52816. Electraulic Presses Limited. Improvements in and relating to control gear for hydraulic presses. (12th October 1953).
- 52817. P. Krishna, D. M. Lal and Sm. Janki Devi Bharati. Improvements in or relating to internal combustion engines.
- 52818. A. Singh. Improvements in or relating to small boilers.
- 52819. Unilever Limited. Improvements in the preparation of edible starch products.
- 52820. Novo Terapeutisk Laboratorium A/S. Process of increasing the physical stability of aqueous suspensions of penicillin compounds. [Addition to No. 50215].
- 52821. Ciba Limited. Manufacture of new pyridine compounds.
- 52822. Ciba Limited. Manufacture of new hydrocinnoles.
- 52823. Ciba Limited. Manufacture of new hydrocinnoles.

29th September 1954

52824. T. Singh. A device for washing the anus and the surrounding area in between the buttocks or any other solid part of the body after answering the call of nature.
52825. Jai Prakash. Hollow building frames.
52826. Tangyes Limited. Improvements connected with hydraulic jacks.
52827. Glaxo Laboratories Limited. Improvements in or relating to the sealing of bottles, jars, vials and like containers. (9th October 1953).
52828. Les Usines De Melle (Societe Anonyme). Process for producing condensation products from saturated oxo-compounds.
52829. The National Smelting Company Limited. Improvements in or relating to the condensation of zinc in metallic vapours from gases containing the same. (6th October 1953).
52830. The General Electric Company Limited. Improvements in or relating to electrical gas discharge tube circuits. (5th October 1953).
52831. The General Electric Company Limited. Improvements in or relating to electrical gas discharge tube circuits. (5th October 1953).
52832. The Gora-Lee Corporation. Methods and apparatus for moulding articles of plastic or the like.
52833. D. M. Lal. Improvements in or relating to pipes.

Alteration of Date

49784. Post-dated 4th November 1953, under Section 5 of the Act.
52111. Ante-dated 22nd April 1953, under Section 5 of the Act.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of this Gazette of India give notice to the Patent Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Manager of Publications, Civil Lines, Delhi, and also on cash payment at the counter of the Government of India, Central Book Depot, 8, Hastings Street, Calcutta, in the course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of the specifications as shown in the following list.

If required typed copies of the specification together with copies of drawings, if any, can be supplied by the Patent Office, on payment of the necessary charge which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

49187. British Glues and Chemicals, Limited. Improvements in and relating to the separation and/or recovery of fat and/or fat-like material from organic substances containing it or them in cellular or similar systems. (2nd December 1952). Accepted on 23rd September 1954.

Subjecting to intense impacts in presence of excess of liquid in which part of raw material is less soluble than in water.

49277. Gelsenkirchener Bergwerks Aktiengesellschaft. Briquetting of comminuted materials such as fuels, ores or the like. Accepted on 24th September 1954.

Comprising mixing the base material with a binding agent and shaping the resulting mixture, the binding agent consists of a coal tar pitch and an aromatic compound constituted by three rings.

49327. Markham & Company Limited, R. J. Barclay and Boving & Company limited. Improvements in or relating to pelton and other bucket wheels. (9th April 1952). Accepted on 28th September 1954.

Integral portions of a centre part of the wheel form a single support for a bucket and extend along atleast part of radial height of the bucket.

49351. Dyckerhoff & Widmann Kommanditgesellschaft. Improvements in or relating to railroad ties. [Addition to No. 46342]. Accepted on 28th September 1954.

Two bearing bodies, central part of smaller section rounded at least on lower side and single longitudinal steel bar extending through the three parts and tensioned after hardening of concrete, all forming a non-articulated tie.

49435. Compagnie Internationale Des Pieux Armes Frangnoul, Societe Anonyme. Improvements in or relating to hinged girders. Accepted on 27th September 1954.

Several longitudinal elements of reinforced concrete connected together by initially tensioned reinforcement; adjacent ends of elements bear on each other through contact members forming hinges located off the axis of reinforcement.

49436. Compagnie Internationale Des Pieux Armes Frangnoul, Societe Anonyme. Improvements in or relating to the manufacture of concrete articles. Accepted on 27th September 1954.

Part newly removed from mould before hardening locally subjected to compressive stress to modify its shape; pressure maintained till part is sufficiently hard.

49481. Oetiker-Motorbremsen A. G. Improvements in and relating to exhaust brakes for internal combustion engines. Accepted on 23rd September 1954.

Closing member freely journalled in closed bores in wall of exhaust duct, connected on exhaust side to means operated from outside to open and close the member.

49486. D. B. Morton, Senior, D. B. Morton, Junior and G. E. Morton. Improvements in or relating to internal combustion engines. (2nd May 1952). Accepted on 29th September 1954.

Engine cylinder removably bedded in frame, located against endwise movement and releasably secured by clamping means.

49528. Automatic Telephone & Electric Company Limited. Improvements in telecommunication systems. (13th May 1952). Accepted on 28th September 1954.

The single control path includes at least one gas discharge tube, receiving devices being associated with the control paths.

49572. Anglo-Iranian Oil Company Limited. Improvements in or relating to the separation of hydrocarbons. Accepted on 23rd September 1954.

Reacting mixture of hydrocarbons with urea solution, bubbling gas through the product with decantation to remove raffinate and recovering extract hydrocarbons from urea solution.

49651. Robert Bosch GMBH. Improvements in fuel injection nozzles for internal combustion engines. Accepted on 23rd September 1954.

Pin on the end of nozzle needle penetrates cylindrical injection aperture of at the most 0.9 mm. with spacing around it during first part of opening stroke; when needle is completely raised aperture is fully open; nozzle operates first as pin nozzle and then as hole nozzle.

49682. B. Rajnai. Improvements in hand-operative knitting machines. Accepted on 23rd September 1954.

A needle-bed embodying a row of reciprocal needles having arrangement to move the needles backwardly and forwardly needle retaining means and a shuttle device.

49683. B. Rajnai. Improvements in hand-operative knitting machines. Accepted on 23rd September 1954.

A needle-bed embodying a row of reciprocal needle each consisting of an upstanding hook portion at the knitting end and extending into a stem which extends into a downturned leg at the inner end of the needle.

49784. M.A.F. Societe Civile D'Etudes Pour Material De Fonderie. Improvement for the remote control of apparatus driven by means of a compressed fluid and compressed fluid distributor particularly utilisable for this control. (6th November 1952). Accepted on 27th September 1954.
- Rotative distributors for compressed fluid actuated by adjustable lugs and means for displacing lugs relative to distributors to modifying fluid distribution.*
49900. J. Stone & Company (Deptford) Limited. Improvements relating to the magnet systems of electro-magnetic regulators, relays or the like. (14th July 1952). Accepted on 23rd September 1954.
- Consisting of a core composed of longitudinally grain-oriented magnetic strip material and having an open gap for co-operating with the moving element of the regulator, relay or the like.*
50119. Lane & Whittaker Limited. Improvements in sawing or cutting appliances. (20th December 1952). Accepted on 24th September 1954.
- Forwardly projecting power shaft housing tube mounted on a wheeled chassis to be rotatably adjustable about its axis.*
50250. W. Ritzerfeld and G. Ritzerfeld. Improvements in or relating to rotary duplicating machines. Accepted on 28th September 1954.
- Comprises side walls carrying a printing drum and a counter-pressure roller cooperating with the drum.*
50276. Societe Des Etablissements Barbet. Improvements in and relating to the purification of alcohol. Accepted on 24th September 1954.
- Replacing known methods of hydro-selection or purification by "super-purification" effected under vacuum and at low temperature.*
50316. British Insulated Callender's Construction Company Limited. Improvements in the making of concrete foundations. (15th October 1952). Accepted on 27th September 1954.
- Mould of thin flexible non-metallic material of sufficient strength placed and having base larger than mouth placed in hole and around foot of tower or pole, filled with wet concrete to embed the foot.*
50387. Reynolds Metals Company. Electrolytical production of metallic solids. Accepted on 24th September 1954.
- Comprising forming a molten anhydrous electrolyte containing atleast one halogen compound of the metal and atleast one halogen metal compound selected from the metals more electro-negative, electrolysing the electrolyte within a cell in contact with a cathodic liquid selected from the group consisting of mercury and amalgam.*
50554. Dunlop Rubber Company Limited. Improvements in disc brakes. (11th November 1952). Accepted on 24th September 1954.
- The brake comprises a rotatable disc, a pair of angularly movable pressure plates axially aligned one or each side of the disc and pivotally secured to a non-rotatable member and a mechanically operated mechanism to angularly move the plates towards the disc.*
50756. N. V. Lemet Industrie. Improvements in and relating to frameworks for a tent or like structure. Accepted on 29th September 1954.
- Comprises a central column with a hub and spokes at upper end, a rim connecting the spokes and having supporting posts.*
51179. Abitibi Power & Paper Company, Limited. Artificial board. (19th February 1953). Accepted on 24th September 1954.
- Steps of dewatering the wet lap applying a sheet of paper to the surface of the wet lap and consolidating the wet lap and sheet of paper under heat and pressure.*
51206. Titan Company A/S. Process for production of metallic iron concentrates and titanium dioxide concentrates from ores containing ilmenite. Accepted on 23rd September 1954.
- Ore mixed with sodium compounds is heated in presence of solid carbonaceous reducing agent.*
51267. Radio Corporation of America. Magnetic switching device. Accepted on 28th September 1954.
- Half of the cores in each group are magnetically biased to substantial saturation of one of the polarity the other cores are magnetically biased to opposite polarity.*
51371. E. C. E. Hemsted. Improvements in and relating to tampons, wads, filtering materials and the like. (27th February 1953). Accepted on 24th September 1954.
- Comprising a fibrous material loaded with an ion-exchange agent, through which the liquid is passed.*
51472. AB Tudor. Improvements in or relating to methods and means for drying accumulator electrodes. (25th January 1954). Accepted on 27th September 1954.
- The water in the electrodes is replaced by a liquid.*
51524. Council of Scientific and Industrial Research. Improvements in or relating to the electroplating of metals on aluminium or its alloys. Accepted on 27th September 1954.
- Aluminium or aluminium alloy is dipped in ferric chloride solution and then electroplating with nickel and/or chromium.*
51590. Inertia Starter Developments Limited, V. Silberstein and L. Danilewicz. Gear means for transferring rotary momentum from one mass to another, and inertia starters incorporating the same. (1st April 1953). Accepted on 27th September 1954.
- Input and output shaft are constrained to limited angular movement through progressively changing gear ratio.*
51629. The Firestone Tire & Rubber Company. Improvements in or relating to sheet material handling device. Accepted on 27th September 1954.
- Comprising a conveyor adapted to move a section of bias-cut tyre ply towards another conveyor.*
51661. D. S. Roberts. Improved electrical appliances using incandescent filaments. Accepted on 23rd September 1954.
- A bulb using incandescent filament is provided with standby filaments which may be connected to external contacts.*
51674. Imperial Chemical Industries Limited. Improved potassium nitrate products and a method for their production. (12th June 1953). Accepted on 29th September 1954.
- Consisting of potassium nitrate crystals bearing on their surfaces a deposit comprising a salt soluble in a saturated potassium nitrate solution at 20°C of a condensation product of 1 mol. of formaldehyde and 2 mols. of naphthalene monosulphonic acid.*
51743. Scammell Lorries Limited. Improvements in and relating to motor road vehicles. Accepted on 23rd September 1954.
- Torque reaction links and springs have their outer ends attached to the axle casings by ball type assemblies and their medial parts to vehicle frame by lateral floating central fulcrum mountings.*
51832. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the manufacture of propynylcarbinols. Accepted on 24th September 1954.
- Reacting a propynyl halide by means of a zinc reaction with a ketone of the formula R-CO-R'.*

51861. W. Strikfeldt & Co. Method and apparatus for regulating the wall temperature in the melting zone of cupolas. Accepted on 23rd September 1954.

Forcing a cooling liquid through cooling elements in the melting zone of cupola and maintaining working pressure for cooling medium at constant level corresponding to the desired temperature.

51873. The Indian Oxygen & Acetylene Company Limited. Improvements in or relating to the fusion joining of nickel alloys. (30th June 1953). Accepted on 29th September 1954.

Consists of calcium fluoride with at least one alkali metal silicate.

51880. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the manufacture of propynyl-carbinols. Accepted on 23rd September 1954.

By reacting propynyl halide with ketone (R-CO-R') where R is ethyl and R' is methyl or ethyl groups and R, R' together form tetramethylene bridge.

52080. Imperial Chemical Industries Limited. Improvements in or relating to the melting of high melting metals or alloys. (12th June 1953). Accepted on 29th September 1954.

Comprising an arrangement of feed rolls and contact system consisting of a plurality of individually spring-loaded contact brushes arranged in one or more groups.

52111. Council of Scientific and Industrial Research. Enamels for wire wound resistors. [Divisional date, April 22, 1953]. Accepted on 27th September 1954.

Composed of 30-35% PbO, 10-12% Al₂O₃, 12-15% B₂O₃, 18-20% SiO₂, colourants 0-3% alkalies, 18-22% and Fluorine 1-2%.

52162. The Plastic and Industrial Corporation Limited. Improvements in or relating to brushes. Accepted on 24th September 1954.

Wherein the bristle pad is a one piece pad made of polyethylene or like semi-rigid material.

52172. Mannheim Manufacturing and Belting Company. Improvements in or relating to drive belts. Accepted on 23rd September 1954.

Comprising plurality of links in superimposed overlapping relation and stud element having intermediate portion extending longitudinally of the belt and opposite end portions extending through and beyond the outermost links.

52173. Dunlop Rubber Company Limited. Resilient materials suitable for use in upholstery. Accepted on 23rd September 1954.

Comprising a solid foam made up of a foam rubber constituent and a resilient polyurethane foam constituent.

52258. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to bored permanent magnets secured to a shaft. Accepted on 24th September 1954.

A sleeve made of non-porous material is arranged in the bore so as to surround the shaft; and the shaft, the magnet and the sleeve are secured by cement.

52392. The Mond Nickel Company Limited. Process and apparatus for making additions to liquid metal. Accepted on 24th September 1954.

Into molten metal is introduced addition agent in a pressure vessel by a plunger which passes through an inlet opening in the vessel and which in its innermost position closes the inlet opening.

52414. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to devices comprising two

gaseous and or vapour-discharge tubes stabilized capacitively and inductively respectively. Accepted on 28th September 1954.

Wherein the circuit of the tube stabilized capacitively is connected, in series with part of the series-impedance of the tube stabilized inductively, to the connecting members of the device and the heating-current windings of the tubes are connected in a particular manner.

Printed Specifications Published

A limited number of printed copies of the undernoted specifications are available for sale from the Manager of Publications, Civil Lines, Delhi, or on cash payment at the counter of the Government of India, Central Book Depot, 8, Hastings Street, Calcutta, at two rupees per copy :—

Recording of Court Decrees and Orders under Section 33 in Register of Patents

Decree granting permanent injunction in respect of patent No. 43623 in Civil Suit No. 86 of 1954 filed before the Madras High Court has been recorded.

Registration of Assignments, Licences, etc.

Assignments, Licences or other transactions affecting the interests of the original patentees have been registered in the following cases. The number of each case is followed by the names of the parties claiming interest :—

36188. McKee Development Corp.

47411. President of India.
